

FASNY Museum of Firefighting

Field Trips for Grades 3-4

Field trips for grades 3-4 consist of two components: the *History of Firefighting* tour and the interactive *Science of Fire* program, both described below.

Please note: below is a general summary of what is offered for Museum field trips; field trips will be adjusted to fit your group's age and needs.

History of Firefighting: Ever wondered how firefighters went from fighting fires with buckets of water to operating the humongous fire trucks of today? Bring your group and learn all about the history of firefighting through an interactive tour. After the tour, see if your group can beat the clock at the popular bucket brigade interactive. This part of the tour meets NYS Social Studies Learning Standards for grades 3 and 4.

The Science of Fire: Join Professor Sparks in her lab, as she takes your class through concepts such as the elements of fire, heat and fuel sources, chemical reactions, and much more. Students will have the opportunity to assist Professor Sparks in completing her science experiments, all while learning the important concepts of fire safety. Students then will have the opportunity to enjoy the Museum's interactive discovery trucks. This part of the tour meets NYS Science Learning Standards for grades 3 & 4.
